

Welcome to the Guest House of the University of Bayreuth

Dear Guest,

welcome to the Alexander von Humboldt-Haus, the guest house of the University of Bayreuth. The House comprises 14 apartments of various sizes for scientists from all over the world, as well as a seminar room - the so-called International Meeting Centre. Please make yourself at home in here!

We have made an effort to equip and furnish this house and each apartment in order to make sure you will find everything you need for a pleasant, comfortable and uncomplicated stay.

However, please treat our house, the garden and your apartment the same way you would treat our own home. We, and also the tenants moving in after you, will appreciate it!

Prof. Dr. Stefan Leible
President of the University of Bayreuth

Dr. Markus Zanner
Chancellor of the University of Bayreuth

Some information about the University

Opening times

The buildings of the University of Bayreuth are in general open at the times given below:

Campus & Geschwister-Scholl-Platz:

Monday to Friday
7 a.m. to 8 p.m.

The University of Bayreuth was built in 1975 and was established as the seventh Bavarian state university. The first degree courses offered at the University were biology and chemistry along with different kinds of teacher-training courses for the subjects mathematics, physics and sports.

Today's profile is characterized by a differentiation into research fields that are already internationally visible and are characterized by a high degree of thematic and programmatic coherence („Advanced Fields“), and into new interdisciplinary research foci that are in the early stages of a dynamic development identified as sustainable by responding to a socially relevant research need („Emerging Fields“).

The “Glashaus” is well worth a visit.

It is located between the GEO building and the new NW III building in the west of the university campus. In the past, the Glasshouse was also used as a canteen. Behind the building, you can lie in the meadow in summer or relax on the forecourt. In winter you can warm up inside with tea or mulled wine at tables or at the bar.

In the evenings there are often bands on stage and you can have a good time on the dance floor.

Another attraction located on the area of the University is the Ecological-Botanical Garden (“Ökologischer-Botanischer Garten”).

It offers a unique botanical journey around the world in just a few hours. Here you can experience around 12,000 plant species in natural habitats. The ÖBG serves teaching and research, the preservation of endangered plant and animal species and the public for education and recreation.
